SEMANTICSPACE TECHNOLOGIES
July 2006 - February 2010

Role: Software Engineer – .NET Development

Contributed as a software engineer on the **Wholesale Lending Division project for Bank of America**, focused on the development of a **Loan Origination System (LOS)** to streamline credit evaluation and underwriting processes for B2B users.

A key responsibility involved integrating with **U.S. government credit scoring web services**—**Freddie Mac** and **Fannie Mae**—to fetch applicant credit scores based on the **Social Security Number (SSN)** provided. These integrations played a critical role in automating and supporting the **underwriting decision-making process** for wholesale lending division of **BOA**.

Key Responsibilities:
- Analyzed functional specifications and translated them into technical analysis document.
- Developing and maintaining modules using **C#, ASP.NET, ADO.NET**, and **SQL Server**.
- Worked with **.NET Web Services** and **XSLT** to handle data transformations.
- Participated in unit testing, debugging, and integration of service components.

Tech Stack:
- **Languages & Frameworks:** C#, ASP.NET, .NET Framework 1.0
- **Database:** Microsoft SQL Server, ADO.NET
- **Web Services:** .NET Web Services for service-to-service communication
- **Data Transformation:** XSL Stylesheets for XML parsing and formatting

Education:

- Higher Diploma in Software Engineering (2 Yrs.), Aptech Education
- Bachelor's Degree in Arts
- Calcutta University, India
